SHIRIN VELLANI  
Postdoctoral fellow, Faculty of Health Sciences, School of Nursing  
International researchers’ perspectives on including in research, persons with lived experiences in dementia and end of life care

MIRA TRAINEE NETWORK EXECUTIVE COMMITTEE
M Mei, K Noguchi, H Abu Alrob, D Begin, J Brar, M Kamal, S Hatzifilalithis, S Subramaniam

AVA MEHDIPOUR  
PhD candidate, Faculty of Health Sciences, School of Rehabilitation Sciences  
Psychometric properties of the virtually administered gait speed test in older adults

HAJAR ABU ALROB  
PhD candidate, Faculty of Health Sciences, Health Research Methods, Evidence, & Impact  
Osteoporosis treatment rate in long-term care following implementation of the Fracture Risk Scale

KARLA MARTINEZ POMIER  
PhD, Faculty of Science, Department of Chemistry & Chemical Biology  
Understanding how aging leads to amyloid diseases and neurodegeneration

YV RAGHAVA NEELAPALA  
Postdoctoral fellow, Faculty of Health Sciences, School of Rehabilitation Science  
Exploring pain phenotypes in people with early knee osteoarthritis

HAILEY WANG  
Master’s, Faculty of Engineering, School of Biomedical Engineering  
Remote monitoring of mobility & sleep patterns in older adults using context aware smart-home technology to predict abnormal aging in early Alzheimer’s onset

ALEXANDRA MAYHEW  
Postdoctoral fellow, Faculty of Health Sciences, Health Research Methods, Evidence, & Impact  
Understanding the biological pathways through which body composition impacts mobility in older adults

SOPHINI SUBRAMANIAM  
PhD, Faculty of Engineering, School of Biomedical Engineering  
Insole-based sensor system for plantar pressure distribution and gait analysis

WEI SONG  
Postdoctoral fellow, Faculty of Science, Department of Kinesiology  
Sex and age dependent autoimmunity in Alzheimer’s disease model

WOUTER VAN DEN BERG  
PhD, Faculty of Science, Department of Biology  
Analysis of the genetic components underlying aging through the lens of the worm

DEEDEE BEGIN  
PhD, Faculty of Health Sciences, School of Rehabilitation Science  
The use of art as a tool to facilitate conversations about health, well-being, risk & safety with older adults

AMANDA BULL  
Master’s, Faculty of Social Sciences, Health, Aging & Society  
Ageism in the workplace and labour market: The experiences of older adults

KEVIN ZHAO  
PhD, Faculty of Health Sciences, Department of Medicine  
Age-associated inflammation impairs macrophage killing of S. pneumoniae

SAMA JABERI  
Master’s, Faculty of Health Sciences, Psychiatry & Behavioural Neurosciences  
PET tracers for diagnosis of basal forebrain neurodegeneration in aging

DIEGO ROGER-SILVA  
Postdoctoral fellow, Faculty of Health Sciences, School of Rehabilitation Sciences  
Evaluating the association of Inflammatory biomarkers with musculoskeletal pain and falls in older adults. A secondary analysis of data from the Canadian Longitudinal Study of Aging (CLSA)

GEOFF COOMBS  
Postdoctoral fellow, Faculty of Science, Department of Kinesiology  
Vascular contributions to cognitive impairment
